

with a terrible red bumpy rash, even accompanied by a slight fever that recurred for two days. Little children are so very curious that they're bound to explore new things, especially while in the woods, but this is all the more reason that the dangers or accidents that may occur in the woods, for example, should be specifically explained to the kids so that they will not be harmed by finding out for themselves the hard way. We had not warned the children that some wild flowers & plants are not to be touched; once again, remind the children to pray while they play!

**23. ANOTHER BUMP ON HIS HEAD RESULTED WHEN DAVIDITO WALKED RIGHT INTO THE KITCHEN ONE NIGHT WHEN THE TILE FLOOR WAS STILL WET** after mopping & he immediately slipped & bumped the back of his head on the hard floor! He cried out real hard at first but I was pleasantly surprised at how much faith he manifested in getting over it right away. It must have really hurt him but he didn't pass out like he used to, thank the Lord! Especially with children in the house, floor-moppers should always block off the entrance to the wet floor & area with a chair & a mop so as to warn everyone with a big "visual blockade" not to enter & chance slipping on the wet floor!

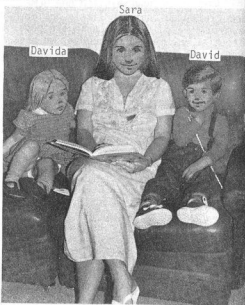

**24. ONE OF THE BIGGEST LESSONS I HAVE LEARNED FROM AN ACCIDENT** was when David & Davidita were running 'round & 'round in circles in the bedroom & I had warned them to settle down. Well, David kept on going & soon tripped on the rug & fell forward to bump his front teeth right smack against the wooden chest of drawers! Ouch!

**25. I COULD SEE RIGHT AWAY THAT HIS FRONT UPPER-LEFT TOOTH** was pushed back quite a bit & even a little bit up inside the gums so that it was no longer even with his other front tooth! A big ugly purple bruise formed on his entire upper gum area; he also bruised his chin & really cried out in pain!

**26. OF COURSE WE PRAYED DESPERATELY & WROTE MOMMY & DADDY A NOTE** about it right away for their prayers too. Daddy said later that it was really nothing to worry about since a child's baby teeth are almost elastic & very pliable & that they would fix themselves back in time with the Lord's help. And they did, PTL!

**27. DAVID WAS SPEAKING A LITTLE BIT LISPY AFTER THE ACCIDENT**, but in about two weeks time it was completely healed, although the tooth remained a darker colour than the other one for quite awhile, but it evened out & fixed itself just as Daddy said, PTL! I put vitamin E from a capsule on the inside of his gums & on the outside bruise on his chin to aid & hasten healing.

**28. PERHAPS IT'S HARD FOR OTHERS TO IMAGINE THE DANGERS & CONSEQUENCES THAT CAN RESULT** from someone's carelessness in spreading sickness, disease or even "a little cold" when on a little visit to our house. But when you stop to think should someone in our house get very ill or even catch a "common cold", it can very easily & quickly spread to Dad or Maria, therefore hinder the work world-

Dad & Maria on an afternoon walk in the garden.

wide in such a round-about way! We have been penalised by this careless mistake time & again, as we have told you about before with the whooping cough & even when little baby Techt caught the measles from carriers on a brief visit.

**29. WELL, ON THIS PARTICULAR OCCASION**, the couple then living with us had gone to a Home in the area to visit a family with children who were afflicted with polio, then returned to our house ming-

ling with all of us in the Family, of course, & even around dear Maria who was now pregnant. Well, Dad was very upset, as you can imagine, that we'd all actually been exposed to polio & that we had not even been informed what disease & sicknesses others had been around before their returning to our house. The Lord took care of it all after effectual, fervent prayer, TTL! But it was another lesson on the need to keep quarantined in our Family if at all possible, as soon as we have been exposed to serious illnesses so as not to spread them to others!--It's only Love!

Alfred, Sara & Davidito say, "We love you!"

Making fresh-squeezed orange juice for Mommy & Daddy!
